

# UConn MSE

**UConn MSE OFFERS**

**>\$80,000/YEAR in  
SCHOLARSHIPS**

# Want an average entry-level salary of \$66,069\*? **Want to help advance technology for society?**

## **Major in Materials Science and Engineering**

- Develop higher efficiency solar panels, stronger wind turbines, and longer lasting batteries
- Manufacture the best materials for cell phones, jet engines, and artificial limbs
- Increase the use of sustainable materials for consumer products
- Get hands-on lab experience with metals, ceramics, polymers, and composites
- Travel to national conferences with the Materials Advantage club, or craft your own knife or jewelry with the Metalworking club

Join the highest ranked engineering program at UConn, and also the #1 MSE program in the Northeast!

We are annually offering \$80,000 in alumni-sponsored scholarships exclusively for MSE majors, recognizing academics, lab work, leadership, volunteerism, diversity, and program year! These scholarships can support up to 30 students, and students can also earn scholarships from the School of Engineering. Apply [here](#) by 3/1.
