

materials &ENGINEERING science

Engineering is
strong at UConn.

Materials makes
us stronger.

UConn

Materials Science and Engineering is critical in nearly every field of engineering, and in our everyday lives. That's because every advance in technology depends on newer, stronger, cheaper, lighter, more functional and more sustainable materials. No matter the industry, MSE majors are at the forefront.

Meet MSE Alumnus
Vincent Ybanez Working
at the Forefront of Jet
Engine Technology

Take a glimpse at the
hands-on opportunities
available to UConn
Materials Science
and Engineering
(MSE) students.
